wokwi-slide-potentiometer Reference

Sliding variable resistor (linear potentiometer)

The function and pin-out of the slide potentiometer are same as wokwi-potentiometer. Check out the wokwi-potentiometer docs for more information.

Attributes

Name	Description	Default value
value	Initial value of the potentiometer, between 0 and 1023	"0"
travelLength	Travel length of the tip (mm). Controls the width of the potentiometer. Common values: "15", "20", "30", "45", "60", "100"	"30"

Examples

Result	Attrs
	`{ "travelLength": "15" }`

Result	Attrs
	{ "travelLength": "60" }
	{ "travelLength": "100" }

Simulator examples

- Slide potentiometer + Servo - Control a servo with a slide potentiometer
